## Product Datasheet

### Goat anti Mouse fibrinogen, Clone: [Polyclonal], Monoclonal NMB-GAM/FBG

Artikelname	Goat anti Mouse fibrinogen, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAM/FBG
Hersteller Artikelnummer	GAM/Fbg
Alternativnummer	NMB-GAM/FBG
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to mouse fibrinogen molecule. In immunolectrophoresis and radial immunodiffusion, using various antiserum concentrations against normal mouse plasma a single precipitin line is obtained which shows a rea...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added as it may interfere with the antibody activity. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign
Quelle	Fibrinogen (clotting factor I) is a heat labile beta glycoprotein present in plasma. It is the precursor of fibrin, which is the key protein constituting the network of the blood clot. Thrombin converts fibrinogen to fibrin by limited proteolysis. Fibrin

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added as it may interfere with the antibody activity. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign
Anwendungsbeschreibung	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
