| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                 |
| Produktbeschreibung      | FLI1 is a sequence-specific transcriptional activator. It recognizes the DNA sequence 5-C[CA]GGAAGT-3....                                                                                                                                        |
| NCBI                     | <a href="#">2313</a>                                                                                                                                                                                                                             |
| UniProt                  | <a href="#">Q01543</a>                                                                                                                                                                                                                           |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                             |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP6514a was selected from the N-term region of human FLI1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
