| Alternativnummer         | ABT-BP6521B-500UG                                                                                                                                                                                                                                 |
| Hersteller               | Abcepta                                                                                                                                                                                                                                           |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Ubiquitous transcription factor required for a diverse set of processes. The CCR4-NOT complex functions as general transcription regulation complex....                                                                                           |
| NCBI                     | <a href="#">9337</a>                                                                                                                                                                                                                              |
| UniProt                  | <a href="#">Q9UFF9</a>                                                                                                                                                                                                                            |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                              |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP6521b was selected from the C-term region of human CNOT8. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
