| Hersteller               | Abcepta                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Actins are highly conserved proteins that are involved in various types of cell motility, and maintenance of the cytoskeleton. In vertebrates, three main groups of actin isoforms, alpha, beta and gamma have been identified. The alpha actins are found... |
| NCBI                     | <a href="#">71</a>                                                                                                                                                                                                                                            |
| UniProt                  | <a href="#">P63261</a>                                                                                                                                                                                                                                        |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP6532a was selected from the N-term region of human ACTG1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.             |
