| Hersteller               | Abcepta                                                                                                                                                                                                                                           |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                  |
| Produktbeschreibung      | MED28 may be part of a complex containing NF2/merlin that participates in cellular signaling to the actin cytoskeleton downstream of tyrosine kinase signaling pathways....                                                                       |
| NCBI                     | <a href="#">80306</a>                                                                                                                                                                                                                             |
| UniProt                  | <a href="#">Q9H204</a>                                                                                                                                                                                                                            |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                              |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP6873b was selected from the C-term region of human MED28. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
