| Hersteller               | Abcepta                                                                                                                                                                                                                                         |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                |
| Produktbeschreibung      | Homogentisate 1,2-dioxygenase (HGD) gene mutations are the molecular cause of alkaptonuria, a rare hereditary disorder of the phenylalanine catabolism....                                                                                      |
| NCBI                     | <a href="#">3081</a>                                                                                                                                                                                                                            |
| UniProt                  | <a href="#">Q93099</a>                                                                                                                                                                                                                          |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                            |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP6903a was selected from the N-term region of human HGD. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
