| Alternativnummer         | ABT-BP7100B-500UG                                                                                                                                                                                                                                |
| Hersteller               | Abcepta                                                                                                                                                                                                                                          |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                 |
| Produktbeschreibung      | Apoptosis-associated tyrosine-protein kinase (ATTK) interacts with CDK5 and my be involved in neuronal differentiation....                                                                                                                       |
| NCBI                     | <a href="#">9625</a>                                                                                                                                                                                                                             |
| UniProt                  | <a href="#">Q6ZMQ8</a>                                                                                                                                                                                                                           |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                             |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP7100b was selected from the C-term region of human AATK. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
