| Hersteller               | Abcepta                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | APPBP1 binds to the beta-amyloid precursor protein. Beta-amyloid precursor protein is a cell surface protein with signal-transducing properties, and it is thought to play a role in the pathogenesis of Alzheimers disease. In addition, this protein can... |

| UniProt                  | <a href="#">Q13564</a>                                                                                                                                                                                                                                        |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP7273d was selected from the N-term region of human APPBP1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.            |
