| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | IGFALS is a serum protein that binds insulin-like growth factors, increasing their half-life and their vascular localization. Production of the protein, which contains twenty leucine-rich repeats, is stimulated by growth hormone. Defects in this prot... |

| UniProt                  | <a href="#">P35858</a>                                                                                                                                                                                                                                        |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP7478c was selected from the Center region of human IGFALS. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.            |
