| Hersteller               | Abcepta                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | DPT is an extracellular matrix protein with possible functions in cell-matrix interactions and matrix assembly. This protein is found in various tissues and many of its tyrosine residues are sulphated. The protein is postulated to modify the behavior... |
| NCBI                     | <a href="#">1805</a>                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">Q07507</a>                                                                                                                                                                                                                                        |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP7485c was selected from the Center region of human DPT. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.               |
