| Hersteller               | Abcepta                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | SHIP1, SH2-containing inositol phosphatase 1, hydrolyzes phosphatidylinositol-3,4,5-triphosphate to phosphatidylinositol-3,4-bisphosphate. SHIP1 is a cytosolic phosphatase that affects calcium flux, cell survival, growth, cell cycle arrest, and apopt... |
| NCBI                     | <a href="#">3635</a>                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">Q92835</a>                                                                                                                                                                                                                                        |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP8473b was selected from the C-term region of human hSHIP1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.            |
