| Hersteller               | Abcepta                                                                                                                                                                                                                                          |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                 |
| Produktbeschreibung      | CD24 is a sialoglycoprotein that is expressed on mature granulocytes and in many B cells. This protein is anchored via a glycosyl phosphatidylinositol (GPI) link to the cell surface....                                                        |
| NCBI                     | <a href="#">100133941</a>                                                                                                                                                                                                                        |
| UniProt                  | <a href="#">P25063</a>                                                                                                                                                                                                                           |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                             |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP8782a was selected from the N-Term region of human CD24. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
