| Hersteller               | Abcepta                                                                                                                                                                                                                                             |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                    |
| NCBI                     | <a href="#">79742</a>                                                                                                                                                                                                                               |
| UniProt                  | <a href="#">Q9H7Y0</a>                                                                                                                                                                                                                              |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP8989c was selected from the Center region of human CXorf36. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
