| Hersteller               | Abcepta                                                                                                                                                                                                                                                      |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                             |
| Produktbeschreibung      | ELOVL2 could be implicated in tissue-specific synthesis of very long chain fatty acids and sphingolipids. This protein may catalyze one or both of the reduction reaction in fatty acid elongation, i.e., conversion of beta-ketoacyl CoA to beta-hydroxy... |
| NCBI                     | <a href="#">54898</a>                                                                                                                                                                                                                                        |
| UniProt                  | <a href="#">Q9NXB9</a>                                                                                                                                                                                                                                       |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                         |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP9191a was selected from the N-term region of human ELOVL2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.           |
