| Hersteller               | Abcepta                                                                                                                                                                                                                                              |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">79680</a>                                                                                                                                                                                                                                |
| UniProt                  | <a href="#">Q7L3V2</a>                                                                                                                                                                                                                               |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                 |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP9220b was selected from the C-term region of human C22orf29. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
