| Alternativnummer         | ABT-BP9734C-500UG                                                                                                                                                                                                |
| Hersteller               | Abcepta                                                                                                                                                                                                          |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                 |
| Produktbeschreibung      | VAV2 is the second member of the VAV guanine nucleotide exchange factor family of oncogenes. Unlike VAV1, which is expressed exclusively in hematopoietic cells, VAV2 transcripts were found in most tissues.... |
| NCBI                     | <a href="#">7410</a>                                                                                                                                                                                             |
| UniProt                  | <a href="#">P52735</a>                                                                                                                                                                                           |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                             |
