| Alternativnummer         | ABT-BP9766B-500UG                                                                                                                                                                       |
| Hersteller               | Abcepta                                                                                                                                                                                 |
| Kategorie                | Proteine/Peptide                                                                                                                                                                        |
| Produktbeschreibung      | This gene encodes a translation initiation factor that is involved in mitochondrial protein synthesis. Polymorphism in this gene is associated with the onset of Parkinsons disease.... |
| NCBI                     | <a href="#">219402</a>                                                                                                                                                                  |
| UniProt                  | <a href="#">Q9H2K0</a>                                                                                                                                                                  |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                    |
