| Hersteller Artikelnummer | BP5398c                                                                                                                                                                                                                                                       |
| Alternativnummer         | ABT-BP5398C-500UG                                                                                                                                                                                                                                             |
| Hersteller               | Abcepta                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | This gene encodes a member of the LIV-1 subfamily of the ZIP transporter family. The encoded transmembrane protein functions as a zinc transporter. Mutations in this gene have been associated with the spondylocheiro dysplastic form of Ehlers-Danlos s... |
| NCBI                     | <a href="#">91252</a>                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">Q96H72</a>                                                                                                                                                                                                                                        |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target-Kategorie         | The synthetic peptide sequence is selected from aa 171-185 of HUMAN SLC39A13                                                                                                                                                                                  |
