| Hersteller               | Abcepta                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Modification of target proteins by ubiquitin participates in a wide array of biological functions. Proteins destined for degradation or processing via the 26 S proteasome are coupled to multiple copies of ubiquitin. However, attachment of ubiquitin o... |

| UniProt                  | <a href="#">Q9UHP3</a>                                                                                                                                                                                                                                        |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target-Kategorie         | The synthetic peptide sequence used to generate the antibody AP2150b was selected from the C-term region of human USP25 . A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.            |
