| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Full length recombinant human FSCN1 protein                                                                                                                                                                                                                   |
| Produktbeschreibung      | Recognizes a protein of 55kDa, which is identified as fascin-1. Its actin binding ability is regulated by phosphorylation. Antibody to fascin-1 is a very sensitive marker for Reed-Sternberg cells and variants in nodular sclerosis, mixed cellularity, ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [rFSCN1/6464]                                                                                                                                                                                                                                                 |
