| Artikelnummer            | ROC-18-8815-33                                                              |
| Hersteller Artikelnummer | 18-8815-33                                                                  |
| Alternativnummer         | ROC-18-8815-33                                                              |
| Hersteller               | Rockland Immunochemicals                                                    |
| Wirt                     | Mouse                                                                       |
| Kategorie                | Antikörper                                                                  |
| Applikation              | IP, WB                                                                      |
| Spezies Reaktivität      | Sheep                                                                       |
| Konjugation              | HRP                                                                         |
| Klonalität               | Monoclonal                                                                  |
| Konzentration            | 1000X (see application note, titrated reagent enough for 80 blots)          |
| Klon-Bezeichnung         | [eB270]                                                                     |
| Puffer                   | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2                  |
| Formulierung             | Liquid (sterile filtered)                                                   |
| Target-Kategorie         | Sheep                                                                       |
| Application Verdünnung   | WB: 1:1000                                                                  |

|                        |                                                                                                                                                                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Sheep IgG HRP TrueBlot has been tested in western blot and immunoprecipitation and may also be used for detection in immunoblotting assays that do not employ immunoprecipitation. Sheep IgG TrueBlot is provided as 1000X solution. To conserve reagent, we |
