| Hersteller               | LifeSpan Biosciences                                                                                                                                                                                                                                           |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                     |
| Spezies Reaktivität      | Bovine, Canine, Equine, Gallus, Guinea pig, Human, Monkey, Mouse, Rabbit, Rat, Xenopus                                                                                                                                                                         |
| Immunogen                | Synthetic peptide located between aa341-390 of mouse Cacna2d4 (F8VPL1, NP_001028554). Percent identity by BLAST analysis: Human, Gorilla, Monkey, Galago, Marmoset, Mouse, Rat, Elephant, Dog, Bovine, Rabbit, Horse, Opossum, Guinea pig, Zebra finch, Chicke |
| Konjugation              | HRP                                                                                                                                                                                                                                                            |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                     |
| Konzentration            | 0.65 mg/ml                                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">93589</a>                                                                                                                                                                                                                                          |
| Reinheit                 | Immunoaffinity purified                                                                                                                                                                                                                                        |

|                        |                                              |
|------------------------|----------------------------------------------|
| Formulierung           | 100 mM sodium phosphate, pH 7.6, 150 mM NaCl |
| Anwendungsbeschreibung | WB                                           |
