## Product Datasheet

### Human LCP1 / L-Plastin Expression-Ready ORF Clone (GFP, C-terminus) - LS-N50932 LS-N50932-1

|                          |                                                                                                                                                         |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname              | Human LCP1 / L-Plastin Expression-Ready ORF Clone (GFP, C-terminus) - LS-N50932                                                                         |
| Artikelnummer            | LS-N50932-1                                                                                                                                             |
| Hersteller Artikelnummer | LS-N50932-1                                                                                                                                             |
| Alternativnummer         | LS-N50932-1                                                                                                                                             |
| Hersteller               | LifeSpan Biosciences                                                                                                                                    |
| Kategorie                | Molekularbiologie                                                                                                                                       |
| Spezies Reaktivität      | Human                                                                                                                                                   |
| Produktbeschreibung      | Human LCP1 / L-Plastin Expression-Ready ORF Clone in Mammalian Expression Vector pCMV3-C-GFP, with C-Terminal GFP tag. Approximately 10 ug per unit.... |
| Konzentration            | Worldwide                                                                                                                                               |
| NCBI                     | <a href="#">50932</a>                                                                                                                                   |
| UniProt                  | 3936                                                                                                                                                    |
| Reinheit                 | The insert is confirmed by full-length sequencing with the sequencing primers listed.                                                                   |
| Formulierung             | Lyophilized                                                                                                                                             |
| Anwendungsbeschreibung   | Most commercially available competent cells are appropriate for propagation of the plasmid, e.g. TOP10, DH5a, and TOP10F.                               |
