## Product Datasheet

### Human CTCFL / BORIS Expression-Ready ORF Clone (DDK (Flag), N-terminus) - LS-N58990 LS-N58990-1

|                          |                                                                                                                                                                  |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname              | Human CTCFL / BORIS Expression-Ready ORF Clone (DDK (Flag), N-terminus) - LS-N58990                                                                              |
| Artikelnummer            | LS-N58990-1                                                                                                                                                      |
| Hersteller Artikelnummer | LS-N58990-1                                                                                                                                                      |
| Alternativnummer         | LS-N58990-1                                                                                                                                                      |
| Hersteller               | LifeSpan Biosciences                                                                                                                                             |
| Kategorie                | Molekularbiologie                                                                                                                                                |
| Spezies Reaktivität      | Human                                                                                                                                                            |
| Produktbeschreibung      | Human CTCFL / BORIS Expression-Ready ORF Clone in Mammalian Expression Vector pCMV3-N-DDK (Flag, with N-Terminal DDK (Flag tag. Approximately 10 ug per unit.... |
| Konzentration            | Worldwide                                                                                                                                                        |
| NCBI                     | <a href="#">58990</a>                                                                                                                                            |
| UniProt                  | 140690                                                                                                                                                           |
| Reinheit                 | The insert is confirmed by full-length sequencing with the sequencing primers listed.                                                                            |
| Formulierung             | Lyophilized                                                                                                                                                      |
| Anwendungsbeschreibung   | Most commercially available competent cells are appropriate for propagation of the plasmid, e.g. TOP10, DH5a, and TOP10F.                                        |
