Chemiluminescent Western Blot Kit, Unconjugated BYT-ORB342275

Artikelname	Chemiluminescent Western Blot Kit, Unconjugated
Artikelnummer	BYT-ORB342275
Hersteller Artikelnummer	orb342275
Alternativnummer	BYT-ORB342275-1
Hersteller	Biorbyt
Kategorie	Antikörper
Applikation	WB
Spezies Reaktivität	E. coli
Immunogen	Anti-Host Cell Protein Antibody (p/n 100-401-J07) was prepared blending antibodies that have been separately developed by repeated immunizations in rabbit with a mixture of high molecular weight (HMW) and a mixture of low molecular weight (LMW) proteins
Konjugation	Unconjugated
Produktbeschreibung	Chemiluminescent Western Blot Kit...
Reinheit	This Chemiluminescent Western Blot Kit allows for the detection of E.coli host cell proteins present in samples provided by the user. Included in the kit along with Rabbit Anti-Host Cell Protein antibody is a positive protein control, Goat Anti-Rabbit Ig
Application Verdünnung	WB: User Optimized by Kit Protocol

Anwendungsbeschreibung

Use Biorbyt Chemiluminescent Western Blot Kit for detection of E.coli Host Cell Proteins. This kit is useful for both Western blotting and dot blotting methods. After protein separation and transfer, the membrane is probed with Anti-Host Cell Proteins A
