| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, IHC                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment (around aa 366-466) of human EBI3 protein                                                                                                                                                                                                |
| Produktbeschreibung      | Epstein-Barr virus-induced gene 3 (Ebi3) is a widely expressed homolog to the interleukin IL-12 p40 subunit protein that forms a heterodimer with either IL-12 p35 or an IL-12 p35 homolog, p28, to create a new cytokine (IL-27). IL-27 is an early produ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [EBI3/8904]                                                                                                                                                                                                                                                   |
| Molekulargewicht         | 34kDa                                                                                                                                                                                                                                                         |
| Isotyp                   | IgG2b                                                                                                                                                                                                                                                         |

|              |                                                                                                                                                                        |
