| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                    |
| Immunogen                | Recombinant protein corresponding to the cytoplasmic domain<br>(around aa 955-1255) of human c-erbB2                                                                                                                                                                     |
| Produktbeschreibung      | Recognizes a protein of 185kDa, which is identified as c-erbB-2/HER-<br>2/neu. Its epitope is localized in the extracellular domain. C-erbB-<br>2/HER-2 is a member of the EGFR family. This MAb is specific and<br>shows minimal cross-reaction with other members o... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                               |
| Klon-Bezeichnung         | [rERBB2/9538]                                                                                                                                                                                                                                                            |
| Molekulargewicht         | 185kDa                                                                                                                                                                                                                                                                   |

|              |                                                                                                                                                                           |
