| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant human GAD2 (GAD65) protein fragment (around aa 1-200) (exact sequence is proprietary)                                                                                                                                                             |
| Produktbeschreibung      | This MAb recognizes a protein of 65kDa, which is identified as glutamic acid decarboxylase 2 (GDA2). It is responsible for catalyzing the production of gamma-aminobutyric acid from L-glutamic acid. There are two forms of glutamic acid decarboxylases ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [GAD2/8394R]                                                                                                                                                                                                                                                  |
| Molekulargewicht         | 65kDa                                                                                                                                                                                                                                                         |

|              |                                                                                                                                                                        |
