| Produktbeschreibung      | It recognizes a 24-27kDa estrogen-regulated protein, identified as heat shock protein 27 (hsp27). Hsp27 was recently found to be identical to the estrogen-induced p29 and 24K protein. About 50% of breast carcinomas are positive for hsp27 especially t... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [HSPB1/774]                                                                                                                                                                                                                                                   |
| Molekulargewicht         | 27kDa                                                                                                                                                                                                                                                         |
