| Immunogen                | Recombinant full-length human CD8a protein                                                                                                                                                                                                                    |
| Produktbeschreibung      | CD8 is a cell surface receptor expressed either as a heterodimer with the CD8 beta chain (CD8 alpha/beta) or as a homodimer (CD8 alpha/alpha). A majority of thymocytes and a subpopulation of mature T cells and NK cells express CD8a. CD8 binds to MHC ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Molekulargewicht         | 32kDa                                                                                                                                                                                                                                                         |
