Anwendungsbeschreibung

p70 S6 Kinase Peptide is used for blocking the activity of p70 S6 Kinase antibody (catalog number 45-138). The p70 S6 Kinase antibody ships at 0.5 mg/mL and the p70 S6 Kinase Peptide ships as a 100 ug pellet. When peptide is reconstituted in 200 uL water, the concentration will be 0.5 mg/mL, identical to that of the antibody. The best starting ratio would be 1:1 (which means molar excess of peptide relative to antibody when identical volumes are mixed). Mix equal volume of peptide and antibody at the required dilution and leave at ambient temperature for 20 minutes. Then incubate and develop in parallel two blots: one with the antibody and one with the antibody which has been pre-absorbed with the provided peptide.
