| Produktbeschreibung      | Human Transforming Growth Factor Beta Induced Protein (TGF $\beta$ I)<br>CLIA Kit for detecting TGF $\beta$ I in serum, plasma, tissue homogenates,<br>other biological fluids. Species Reactivity: Human (Homo sapiens).<br>Detection Range: 1.37-1,000pg/ml. Sensitivity: 0.55pg/... |
| Detektionsbereich        | 1.37-1,000pg/ml                                                                                                                                                                                                                                                                        |
| Sensitivitaet            | 0.55pg/ml                                                                                                                                                                                                                                                                              |
| NCBI                     | <a href="#">7045</a>                                                                                                                                                                                                                                                                   |
| Formulierung             | 96-Well Plate                                                                                                                                                                                                                                                                          |
| Proben                   | Serum, Plasma, Tissue Homogenates, Other Biological Fluids                                                                                                                                                                                                                             |
| Target-Kategorie         | Transforming Growth Factor Beta Induced Protein (TGF $\beta$ I)                                                                                                                                                                                                                        |
