| Produktbeschreibung      | This gene encodes a protein that binds to the polyA tail found at the 3 end of most eukaryotic mRNAs. It is thought to play a role in the regulation of mRNA metabolic processes in the cytoplasm. This gene is located in a gene-poor region within the X... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
