| Produktbeschreibung      | This MAb recognizes a protein of 56 kDa, identified as cytokeratin 6A (KRT6A). In humans, multiple isoforms of Cytokeratin 6 (6A-6F), encoded by several highly homologous genes, have distinct tissue expression patterns. Cytokeratin 6A is the dominant... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
