| Produktbeschreibung      | Recognizes a protein of 180 kDa, identified as CD11a (Leucocyte Workshop II, Code N202). CD11a complex with the 2 subunit of the integrin family, CD18, to form the cell surface heterodimer, LFA-1 or CD11a /C18 (aLbL). LFA-1 is expressed on all leukoc... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [Cris-3]                                                                                                                                                                                                                                                      |

|                        |                                                                                                                                                                                                                              |
