| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A recombinant fragment (around aa 179-311) of human Villin protein (exact sequence is proprietary)                                                                                                                                                            |
| Konjugation              | CF568                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | Recognizes a protein of 95 kDa, which is identified as villin. It is a major constituent in the microvilli, which compose the brush border of epithelial cells forming absorptive surfaces of the intestinal and renal proximal tubular epithelia. Anti-Vi... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |

|                  |                            |
