| Immunogen                | Recombinant hCG alpha protein                                                                                                                                                                                                                                 |
| Konjugation              | CF488A                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | This MAb reacts with a protein of ~13 kDa, identified as alpha sub-unit of HCG. HCG is a glycoprotein, which is secreted in large quantities by normal trophoblasts. It is present only in trace amounts in non-pregnant urine and sera but rises sharply ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |

| Anwendungsbeschreibung | Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody Immunohistology formalin-fixed 1-2 ug/mL No special pre-treatment is required for staining of formalin-fixed tissues. Note that HIER is NOT recommended for this antibody Optimal dilution for a specific application should be determined by user |
