| Immunogen                | A synthetic peptide of human Erlin-2                                                                                                                                                                                                                          |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | This gene encodes a member of the SPFH domain-containing family of lipid raft-associated proteins. The encoded protein is localized to lipid rafts of the endoplasmic reticulum and plays a critical role in inositol 1,4,5-trisphosphate (IP3) signaling ... |
| Molekulargewicht         | 43 kDa                                                                                                                                                                                                                                                        |
| UniProt                  | <a href="#">O94905</a>                                                                                                                                                                                                                                        |
