| Applikation              | ELISA, WB                                                                                                                                                                                                                                                       |
| Produktbeschreibung      | Angiotensin-converting enzyme 2 (ACE2) is also known as ACEH (ACE homolog), is an integral membrane protein with considerable homologous to ACE, which belongs to the peptidase M2 family. ACE2 is an exopeptidase that catalyses the conversion of angiot...   |
| UniProt                  | <a href="#">Q9BYF1</a>                                                                                                                                                                                                                                          |
| Puffer                   | PBS,pH7.4                                                                                                                                                                                                                                                       |
| Reinheit                 | The protein was purified from 293F and the purity is > 95% (by SDS-PAGE).                                                                                                                                                                                       |
| Application Verdünnung   | The protein has a calculated MW of 111.7 kDa. The protein migrates as 125-150 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation. The R393G(Arginine to glycine at amino acid position 393) mutant human Ace2 protein has been produced in a mamm |
