Goat IgG anti-Mouse Kappa (free + bound chains)-HRPO, MinX none NMB-GAM/BJK(SD+HD)/PO

Artikelname	Goat IgG anti-Mouse Kappa (free + bound chains)-HRPO, MinX none
Artikelnummer	NMB-GAM/BJK(SD+HD)/PO
Hersteller Artikelnummer	GAM/BJK(SD+HD)/PO
Alternativnummer	NMB-GAM/BJK(SD+HD)/PO
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Spezies Reaktivität	Mouse
Konjugation	HRPO
Format	IgG
Spezifität	Kappa (Light Chain) - free and bound determinants
Minimale Kreuzreaktivität (MinX)	no cross-adsorbtion
Produktbeschreibung	The reactivity of the antiserum is directed to the surface and hidden determinants of Ig kappa chain. A reaction is obtained with intact polyclonal or monoclonal immunoglobulins of the kappa type, as well as free kappa light chains. To identify light...
Klonalität	Polyclonal
Klon-Bezeichnung	[Polyclonal]

Puffer	Horseradish peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity It is reconstituted by adding 1 ml sterile distille
Quelle	A pool of purified Bence Jones kappa proteins isolated from mouse urine. Freund's complete adjuvant is used in the first step of the immunization procedure.
Formel	Horseradish peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity
Antibody Type	Secondary Antibody
Anwendungsbeschreibung	ELISA, Immunocytochemistry, Immunohistochemistry (paraffin), Dot blot, Immunoblotting.
