| Immunogen                | The antiserum was produced against synthesized peptide derived from human TIE2. AA range:1068-1117                                                                                                                                                            |
| Produktbeschreibung      | This gene encodes a receptor that belongs to the protein tyrosine kinase Tie2 family. The encoded protein possesses a unique extracellular region that contains two immunoglobulin-like domains, three epidermal growth factor (EGF)-like domains and thre... |
