| Immunogen                | Synthesized peptide derived from human protein . at AA range: 50-130                                                                                                                                                                                          |
| Produktbeschreibung      | Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins.This gene encodes a ribosomal... |
