| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment (around aa1-200) of human HSD17B13 protein (exact sequence is proprietary)                                                                                                                                                               |
| Produktbeschreibung      | Hydroxysteroid 17-beta dehydrogenase 13 (HSD17B13) is an enzyme in the liver that is associated with lipid droplets. It is encoded by the HSD17B13 gene in humans. HSD17B13 levels increase in patients with non-alcoholic fatty liver disease (NAFLD) and... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
