Produktbeschreibung	Mouse monoclonal antibody to human cancer antigen 125 (CA125)...  This product is a mouse monoclonal antibody specific for the human cancer antigen CA 125. It is used for the detection of CA 125 in biological samples, such as serum or ascites fluid, by enzyme-linked immunosorbent assay (ELISA) or flow cytometry (FC). The antibody has a high affinity for the CA 125 antigen and can detect low concentrations of the antigen in various types of cancer cells, particularly ovarian cancer. It is also used as a prognostic marker for ovarian cancer and for monitoring the progression of the disease. The antibody is produced in a mouse and is purified using protein G affinity chromatography. It is available in two different concentrations: 0.5 mg and 0.1 mg.
