| Kategorie                | Biochemikalien                                                                                                                                                                                                                                                |
| Produktbeschreibung      | Cyanine 3 hydrazide is a carbonyl-reactive dye, an analog of Cy3 hydrazide. This reagent can be used for the labeling of various carbonyl-containing molecules such as antibodies and other glycoproteins after periodate oxidation, proteins which have u... |
| Molekulargewicht         | 543.57 kDa                                                                                                                                                                                                                                                    |
| Reinheit                 | 95% (by <sup>1</sup> H NMR and HPLC-MS).                                                                                                                                                                                                                      |
| Formulierung             | Red powder.                                                                                                                                                                                                                                                   |
| Formel                   | C <sub>30</sub> H <sub>40</sub> Cl <sub>2</sub> N <sub>4</sub> O                                                                                                                                                                                              |
