| Artikelname              | Recombinant Cynomolgus macaque Midkine Protein (Fc Tag),<br>Unconjugated                                                                                                             |
| Artikelnummer            | ABC-A317549-100                                                                                                                                                                      |
| Hersteller Artikelnummer | A317549-100                                                                                                                                                                          |
| Alternativnummer         | ABC-A317549-100                                                                                                                                                                      |
| Hersteller               | Antibodies.com                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                     |
| Applikation              | SDS-PAGE                                                                                                                                                                             |
| Konjugation              | Unconjugated                                                                                                                                                                         |
| Konzentration            | Reconstitution dependent.                                                                                                                                                            |
| Molekulargewicht         | The protein has a predicted molecular mass of 39.4 kDa after removal of the signal peptide. The apparent molecular mass of cMDK-hFc is approximately 35-55 kDa due to glycosylation. |
| Tag                      | C-terminal Human Fc Tag                                                                                                                                                              |
| Puffer                   | Lyophilized from sterile Phosphate Buffered Saline, pH 7.4. Normally 5%-8% Trehalose is added as a protectant before lyophilization.                                                 |
| Expression System        | HEK293 cells                                                                                                                                                                         |
| Reinheit                 | > 95% by SDS-PAGE and Coomassie blue staining.                                                                                                                                       |
| Formulierung             | Lyophilized                                                                                                                                                                          |

|                  |                                         |
|------------------|-----------------------------------------|
| Sequenz          | MDK (Lys23-Asp143) + hFc (Glu99-Ala330) |
| Target-Kategorie | Midkine                                 |
