| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Applikation              | Activity Assay, Cell Culture                                                                                                                                                                                                                                  |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Human Luteinizing Hormone is a purified Active Protein. Purity: >90% by SDS-PAGE. Host: 293F Cell. Endotoxin Level: <1.0EU per 1ug, by the LAL method. Species: Human (Homo sapiens). Target Name: Luteinizing Hormone. Accession Number: P25874. Gene ID:... |
| Molekulargewicht         | 37-38kDa                                                                                                                                                                                                                                                      |
| Tag                      | N-Terminal His Tag                                                                                                                                                                                                                                            |
| NCBI                     | <a href="#">7350</a>                                                                                                                                                                                                                                          |
| Puffer                   | PBS, pH7.4, containing 0.01% SKL, 1mM DTT, 5% Trehalose and Proclin300.                                                                                                                                                                                       |
| Expression System        | Eukaryotic expression                                                                                                                                                                                                                                         |

|                  |                     |
