| Produktbeschreibung      | Prokaryotic Human Egl Nine Homolog 1 is a purified Prokaryotic Protein. Purity: >90% by SDS-PAGE. Host: E. coli. Endotoxin Level: <1.0EU per 1ug, by the LAL method. Species: Human (Homo sapiens). Target Name: Egl Nine Homolog 1. Accession Number: Q9G... |
| Molekulargewicht         | 38kDa                                                                                                                                                                                                                                                         |
| Tag                      | Two N-Terminal Tags, His-tag and SUMO-tag                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">54583</a>                                                                                                                                                                                                                                         |
| Puffer                   | PBS, pH7.4, containing 0.01% SKL, 1mM DTT, 5% Trehalose and Proclin300.                                                                                                                                                                                       |
