| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Mouse Cholecystokinin (CCK) ELISA Kit is a precoated, Competitive Inhibition ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids... |
| Detektionsbereich        | 15.625-1000pg/mL                                                                                                                                                                                                                                              |
| Sensitivitaet            | 4.58pg/mL                                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">12424</a>                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">P09240</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target-Kategorie         | Mouse Cholecystokinin (CCK)                                                                                                                                                                                                                                   |

Anwendungsbeschreibung

Assay Length: 4.5 hours. Experimental Method: Competitive Inhibition
