| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Human Collagen and calcium-binding EGF domain-containing protein 1 (CCBE1) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture superna... |
| Detektionsbereich        | 31.2-2000pg/mL                                                                                                                                                                                                                                                |
| Sensitivitaet            | 11.73pg/mL                                                                                                                                                                                                                                                    |
| NCBI                     | <a href="#">578</a>                                                                                                                                                                                                                                           |
| UniProt                  | <a href="#">Q16611</a>                                                                                                                                                                                                                                        |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |

|                        |                                                                            |
|------------------------|----------------------------------------------------------------------------|
| Target-Kategorie       | Human Collagen and calcium-binding EGF domain-containing protein 1 (CCBE1) |
| Anwendungsbeschreibung | Assay Length: 3 hours. Experimental Method: Sandwich                       |
